PROFESSIONAL SUMMARY

Aspiring Full-Stack Developer with hands-on experience building secure, data-driven web and mobile applications using React.js, Flutter, Node.js, and Django. Proficient in designing RESTful APIs, working with relational and non-relational databases (PostgreSQL, MongoDB, Supabase), and delivering responsive UIs with modern frameworks. Passionate about software quality, clean code, and Agile practices — seeking a Software Engineering internship to apply and grow project experience in delivering robust, user-centric software solutions.

EDUCATION

B.Sc. (Hons) in Information Technology — Undergraduate | *Expected: 2027*

Sri Lanka Institute of Information Technology (SLIIT), Malabe

GCE Advanced Level (A/L) | *2013 — 2022*

St. John's College, Nugegoda

TECHNICAL SKILLS

Languages : JavaScript (ES6+), Dart, Python, SQL, HTML5, CSS3

Mobile : Flutter, Provider, go_router, Firebase Cloud Messaging, Firebase Core

Backend : Node.js, Express.js, Django, Django REST Framework

Frontend : React.js, Next.js, Tailwind CSS, HTML5, CSS3, UI/UX Design

Databases : MongoDB, PostgreSQL, SQLite, Supabase, Oracle SQL

Tools : Git/GitHub, Docker, Redis, Celery, AWS S3, Firebase, RESTful APIs, JWT

TECHNICAL PROJECTS

Cream Web — E-Commerce Platform

MongoDB · Express.js · React.js · Node.js (MERN)

[GitHub](#) | [Live Demo](#)

- Architected a full-stack e-commerce platform with JWT-based authentication, protecting all user and order data.
- Built a RESTful API with Express.js handling product listings, cart state, and session management with real-time MongoDB sync.
- Engineered the complete checkout flow from product discovery to order confirmation, optimizing page load with React lazy-loading.

BrightPath-LMS — Learning Management System

Vue 3 · Django · Django REST Framework · PostgreSQL · Redis · Celery

[GitHub](#)

- Built a full-stack LMS for the Sri Lankan university ecosystem with role-based access control (Student, Lecturer, Staff) and NIC/credential verification via OCR (PyTesseract, PyPDF2, python-docx).
- Engineered an asynchronous task queue using Celery + Redis to handle background jobs — including HTML-rich email notifications and AI-powered peer recommendation updates — without blocking the main API thread.
- Developed a custom AI Recommendation Engine that aggregates user activity metrics (module views, completions) to dynamically suggest relevant study materials, with a gamified Points Wallet to drive engagement.
- Implemented stateless JWT authentication, AWS S3 cloud storage, and a decoupled Vue 3 SPA frontend communicating via a RESTful Django REST Framework API.

Sportify — Sports Web Platform

MongoDB · Express.js · React.js · Node.js · Tailwind CSS

[GitHub](#) | [Live Demo](#)

- Built a full-stack sports community platform with dynamic event listings, user profiles, and interactive dashboards.
- Developed a scalable REST API using Node.js/Express with MongoDB, supporting concurrent user sessions and real-time data updates.
- Applied Redux state management and Tailwind CSS to deliver a responsive, accessible UI across all device sizes.

TableFlow — Restaurant Table & Reservation Management App

Flutter · Dart · Supabase (PostgreSQL) · Firebase Cloud Messaging · Node.js/Express · Next.js

[GitHub](#)

- Built a cross-platform Flutter mobile app for restaurants with distinct customer and staff experiences, covering QR table check-in, live order tracking, reservations, and a real-time waitlist/queue system.
- Designed the Supabase (PostgreSQL) backend with Row-Level Security policies for role-based data access across customer, staff, and admin roles, backed by an Express.js service layer.
- Integrated Firebase Cloud Messaging for real-time order and reservation notifications, using Provider for state management and go_router for navigation across 30+ screens.
- Built a companion Next.js admin dashboard for managing tables, reservations, and reports, completing a full-stack restaurant operations platform.

CERTIFICATIONS

- AI/ML Engineer — Stage 1, Stage 2 & Stage 3 (SLIIT)
- MongoDB Node.js Developer Path (MongoDB)
- MongoDB Java Developer Path (MongoDB)
- Python for Beginners (University of Moratuwa — CODL)

SOFT SKILLS

Team Collaboration · Problem Solving · Leadership · Analytical Thinking · Communication · Time Management · Agile / Scrum · Adaptability

EXTRA-CURRICULAR ACTIVITIES

Project Management: Successfully scoped technical requirements, managed deliverables, and met strict deadlines across academic and full-stack projects.

Leadership & Collaboration: Guided technical decision-making in multi-contributor teams with strong analytical and problem-solving skills.

Teamwork & Discipline: Competitive cricket and volleyball player; developing team collaboration and discipline through structured tournaments.
